## SUMMARY

Senior Software Engineer with 5+ years of experience building and maintaining production applications in Java, Spring Boot, Angular, and Ext JS. Comfortable across the full SDLC — from design and implementation to deployment, monitoring, and incident resolution. Experienced in REST APIs, concurrent processing, database performance tuning, and scalable service design. Regularly work with cross-functional teams and mentor engineers on debugging, code quality, and reliable delivery.

## SKILLS

**Core Technologies:** Java 17+, Spring Boot, C# / .NET, REST APIs, Microservices, Angular, Ext JS, JavaScript, HTML, CSS, SQL / PL/SQL, PostgreSQL, Oracle, Multithreading, Hibernate, JPA, Redis, Docker, Kubernetes, Git, System Design, Design Patterns

**Cloud & Data Technologies:** Kafka, MongoDB, AWS (EC2, S3), SQL Server, Event-Driven Architecture, Async Processing, Gen AI-Assisted Development, Messaging, Prometheus, Grafana, Python

**Tools:** JUnit, Integration Testing, Maven, Jenkins, CI/CD, Cursor, GitHub Copilot, IntelliJ IDEA, VS Code, Postman, JMeter, Git, GitHub, Bitbucket, JIRA, Confluence

## PROFESSIONAL EXPERIENCE

### Amdocs

#### Senior Software Engineer

Apr 2026 – Present

Gurgaon, India

- Build features for an Enterprise Modernization Platform that migrates legacy applications into Java and C# / .NET ecosystems.
- Develop Java-based migration accelerators and code transformation tooling used across multiple modernization programs.
- Use AI-assisted development tools and LLMs for large-scale code analysis, impact assessment, and faster troubleshooting across modernization pipelines.

### STMicroelectronics

#### Application Software Engineer

Feb 2022 – Apr 2026

Noida, India

- Architected a Bulk Request Processing Platform that improved operational productivity by 20% for high-volume business workflows.
- Built a Parallel File Ingestion Service using ExecutorService and BlockingQueue to handle peak load with better throughput and resource utilization.
- Designed a Java + PL/SQL integration layer with retry logic and error handling for business-critical data migrations.
- Optimized SQL queries, indexing strategies, and database access patterns to reduce latency on large transactional workloads.
- Implemented asynchronous producer-consumer pipelines for background processing and improved system reliability under load.
- Developed responsive Ext JS screens with HTML/CSS/JavaScript and integrated them with Java backend services for business-critical internal applications.
- Automated recovery of scheduled jobs using Quartz, reducing manual production support by 30%.
- Led production incident investigations and mentored junior engineers on debugging practices and code quality.

### Nagarro

#### Software Engineer

Oct 2020 – Feb 2022

Gurgaon, India

- Built Angular UI components and secure REST APIs for enterprise banking applications serving high-volume business workflows.
- Integrated AOP-based telemetry for real-time latency and throughput monitoring across backend services.
- Built a Maven code generation plugin to automate POJO creation from JSON schemas and cut repetitive development work.

## EDUCATION

### DCRUST, Haryana

B.Tech in Electronics & Communication

2016 – 2020

GPA: 7.91 / 10.00
